PERSONAL SUMMARY

Senior Software Engineer with a strong focus on solving complex technical problems through reliable systems, product delivery, and collaborative leadership. Experienced in product development, agile delivery, stakeholder communication, and mentoring teams across engineering and business contexts. Brings a practical approach to software engineering, with a passion for building maintainable solutions and improving team effectiveness.

EXPERIENCE

LEXISNEXIS SOUTH AFRICA | SENIOR SOFTWARE ENGINEER

Sep. 2025 - Present | Johannesburg

- Contributed to delivery of the flagship product to Austria.
- Helped manage the team's codebases and led technical reviews across them.
- Led migration of team repositories to GitHub, configured pull-request approval groups, and recreated Azure Pipelines against the new source.

Tech Stack: C#, Angular, React, GitHub, Azure Pipelines, Azure DevOps

LEXISNEXIS SOUTH AFRICA | SOFTWARE ENGINEER LEAD

Oct. 2023 - Sep. 2025 | Woodmead, Johannesburg

- Led a new team supporting the global release of a product to France and South Africa, including region-specific customisations and translations.
- Worked closely with project managers and stakeholders to negotiate delivery roadmaps and scope changes.
- Resolved blockers, managed workload across multiple projects, and improved team delivery effectiveness.
- Served as Scrum Master and Line Manager, improving Agile metrics and supporting onboarding, mentoring, and personal development planning.

Tech Stack: C#, Angular, React, Azure DevOps, Jenkins, AWS, SQL

LEXISNEXIS SOUTH AFRICA | SOFTWARE ENGINEER

Oct. 2022 - Aug. 2023 | Johannesburg

- Migrated legacy codebases to modern frameworks and improved test coverage across the product.
- Assisted in a data migration project, including data validation and transformation.
- Supported the team's Scrum process as a Scrum Coach.

Tech Stack: C#, Angular, React, Azure DevOps, xUnit, Jest

NTT (PREV. DIMENSION DATA) | SOFTWARE ENGINEER

Feb. 2019 - Sep. 2022 | Johannesburg, South Africa

- Contributed to an automated onboarding process for HR and supported a Proof of Concept for mobile in Xamarin in my graduate years
- Worked on automation solutions for private and government entities, using SharePoint and JavaScript injection along with PowerApps, Power Automate, and Nintex to support business process automation.
- Presented to clients and gathered requirements, design acceptance tests, and supported solution delivery.

Tech Stack: SharePoint, JavaScript, PowerApps, Power Automate, Nintex
